

## **Squeegee Pigs**

Squeegee pigs are also referred to as batching pigs, line-fill pigs, and displacement pigs and, when equipped with gauging plates, gauging pigs. Prior to running any internal pipeline cleaner in a new line, it may be advisable to run squeegees to ensure removal of skids, mud and other debris, thereby increasing efficiency of the cleaner. These squeegees are ideal for separating products, purging lines of air, and clearing lines of test water.
